

Estimating Report Manager

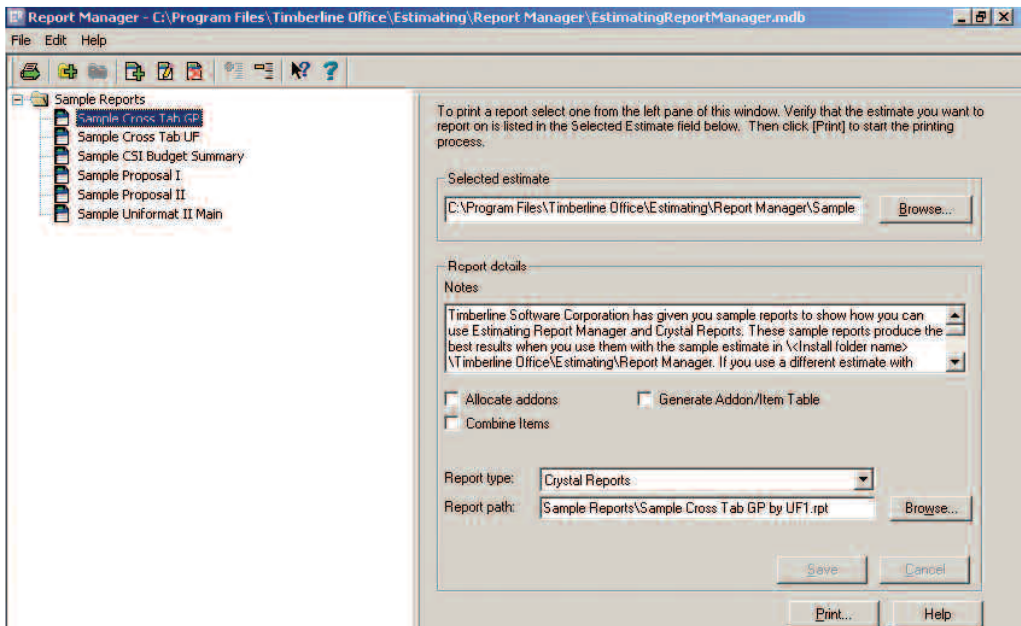

Estimating Report Manager simplifies the task of reporting on estimates that you produce with your Estimating software.

For extensive analysis and reporting, you can easily export estimate data into a reportable file to use with Crystal Reports® or Microsoft Access. Select any estimate for reporting, combine estimate items, round item quantities, allocate add-ons, and more. The software provides sample Crystal Report designs, including proposal templates and cross-tab reports, for professional-looking presentations of estimate information. It's a simple way to organize and manage all estimating reports in one central location.

Features and efficiencies

- Organize and manage estimating reports in one central location.
- View and report on estimate data through custom report designs created in Crystal Reports or Microsoft Access.
- Extend your analysis and presentation capabilities using cross-tab reporting functionality in Crystal Reports.
- Demonstrate professionalism with polished proposal templates.
- Includes a copy of Sage Timberline Office-compatible Crystal Reports and ODBC software.

Estimating Report Manager is a part of Sage Timberline Office, fully integrated software created to streamline work and connect the people you depend on to build your business.
